

Custom security solutions.

Get secure thinking and results with Star Asset Security.

We are more than your typical security company. We design, install and service security systems that are customized to your business, stay within your budget and satisfy your security needs.

As highly trained specialists, we have the expertise expected by security-conscious customers. We have decades of technical experience in security and safety systems, and with continuous education, we always stay on top of the latest technologies.

Star Asset Security, Inc., is a full-service provider of electronic security, video surveillance, access control and fire detection products. Since 1993, we have served commercial, industrial and institutional companies, as well as government agencies on the federal, state and local levels.

Our valued customers include:

- Verizon Wireless
- Bon Secours St. Francis Health System
- Jacobs Engineering
- Skyline Telephone Membership Corp.
- Appalachian State University
- U.S. Dept. of the Treasury
- U.S. Air Force
- U.S. Army
- U.S. Marine Corps
- U.S. Dept. of Homeland Security
- General Services Administration

Quoting – We will provide you with a price estimate on a specific project or security system. Call or email us for more information.

Planning – Star Asset Security will work with you to develop a strategic security plan that is specific to your security needs. We will meet anytime, anywhere—your office, our office or your project site.

Designing – Our security experts will customize the right system for your business with brand name, state-of-the-art technologies.

Financing – Our customized systems will stay within your budget. Plus, we provide several payment options for flexibility in acquiring products and services.

Installing – Our experienced technicians will ensure the job is done right.

Servicing – We stand behind our products and services with the best customer service available, day or night. We'll even service systems provided by other security companies.

Upgrading – Our custom designs provide paths for future upgrades and expansions as your needs change.

The Integrated Protection System is the complete security and safety solution for commercial, industrial and governmental applications. Electronic security protects your facility when you're not there and your employees when you are. Video surveillance eliminates vulnerable areas with ongoing, remote supervision. Access control allows only authorized personnel and visitors access to secure areas that are critical to your business operations. And fire detection alerts you and the fire department in case of a potentially devastating fire emergency. With all of these features, the Integrated Protection System ensures total protection of your valuable assets.

System Monitoring by Star Asset Security means we are always looking out for you. Burglary, fire and emergency signals are monitored 24/7 through an FM and UL listed central monitoring facility. You can also add additional systems, such as environmental, equipment operations and personnel management. Whether it's nighttime, weekends or holidays—System Monitoring by Star ensures rapid response and your peace of mind.

Individual security systems are also available for your protection. This includes electronic security, video surveillance, access control and fire detection. For each customized security system, we use the highest quality, cutting-edge security technologies. Star Asset Security is a certified dealer for: Hirsch Electronics, Panasonic Security Systems iPro Certified, Honeywell Government Solutions, Pelco Endura and Government Sales, Vindicator Technologies, S2 Security, Axis Communications and Vicon CCTV.

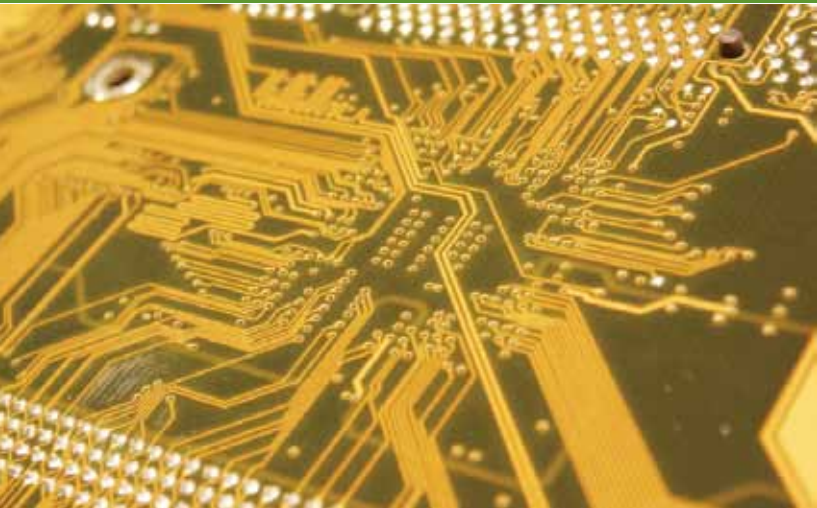

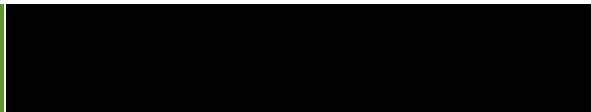

To ensure we are always on top of cutting edge technologies, Star Asset Security is a member of PSA, the world's largest electronic security co-op. With PSA, we have access to in-depth training, certification courses and more than 200 leading manufacturers in the security field.

For your protection, Star Asset Security is officially licensed in Florida, Georgia, North Carolina, South Carolina, Tennessee and West Virginia for installation, service, monitoring and sales of security systems. Our services are available in other states with reciprocal licensing agreements. Please contact us for additional information.
